# IS YOUR BUSINESS PREPARED?

The Dangerous Goods Safety (Road and Rail Transport of Non-explosives) Regulations 2007 (WA) were proclaimed on the 1<sup>st</sup> of March 2008.

By the 1<sup>st</sup> of March 2009, The West Australian Department of Mines and Petroleum (Resource Safety Division) will require that all companies transporting Dangerous Goods by road or rail are themselves an approved emergency responder, or have a contract in place with an approved emergency responder. This legislation places the emphasis on transport organizations to ensure that a spill or incident anywhere in Western Australia is dealt with in a safe and timely manner.

Safety Enterprises is a West Australian company at the forefront of dangerous goods incident response and recovery. We are a Department of Mines and Petroleum approved responder (<http://www.dmp.wa.gov.au/6682.aspx#6790>) and all our staff are trained professionals in Hazardous Material Emergency Response and clean up. Our teams are available 24 hours a day, 365 days a year and can provide unrivalled experience to your company when it counts most.

Additionally Safety Enterprises can supply emergency response spill plans, policies and procedures as well as hazardous materials training in line with Nationally Endorsed Training Packages.
